

Reduce, Reuse, Recycle

We believe in saving the planet, therefore we are very proud to say we RECYCLE wood waste.

We recycle or re-use all of our by-products from our daily pallet operations. Cut-offs from our saws and non-repairable used pallets become Landscape Mulch or Animal Bedding. Sawdust is used as bedding for equestrian facilities & Animal Bedding is used by area livestock farmers for cattle. Contact us today to find out how we can help you.

Our landscape mulch comes in a variety of colors: Red, Natural, Gold, Dark Brown, Light Brown, and Black. We are the premier producer of landscape mulch and wood by-products in northern Indiana.
